## **m About me**

I like everything related to programming in general. I learn new programs and programming languages quickly and easily and I am always ready to improve my knowledge and skills.

I am team player always ready to help and share my knowledge and skills to other team members.

## **m Working experience**

### • Freelancer 2012 ~ 2018

As a freelancer, I have created many websites for various companies and individuals where I have mastered technologies such as HTML, Css, Javascript, creating websites in WordPress, etc. What I am particularly proud of is that during that time I expanded my existing knowledge and started creating web applications using technologies such as PHP, jQuery, MySQL, etc.

### • Kappastar group 2018 ~ Now

I have created 8 WordPress websites and 3 large web applications for the Kappastar Group. I developed the logic, functionality and appearance for the applications completely by myself. I wrote every line of code for the front-end and back-end

## **m Hobbies**

- Gym, running
- Cinema, theater
- Dominoes
